

Determination by Genitalia Examination (gen. det.)

Several species of moth cannot be identified from external features. For these species it is necessary to resort to genitalia examination, usually via a full dissection, to firmly establish the identity of the moth.

Please find below a list of people who offer this service in Norfolk. Please note a small donation/ fee may be applicable to cover the cost of chemicals and slides etc.

Mick A'Court - Mick_Acourt@zoho.com

Jim Hodgkinson - jimhodgkinson1953@hotmail.com

Keith Kerr - keithkerr@hotmail.co.uk

Jon Clifton - jon.clifton@btinternet.com (Autumn/Winter only)

Dave Hipperson - david.hippersonhippersion@btinternet.com

If anyone would like to be added to this list please contact Jim Wheeler.

Why not learn to gen. det.?
